PROJECTS

Oivan - sakani.sa

Aug 2022 - Current

Full-stack Developer

Country: KSA
Team size: 40
Tech stacks used: Ruby on rails, Angular
Responsibilities:

- Built Rails APIs and Angular modules, collaborated with large cross-functional teams, optimized performance, and supported deployments on Docker/Kubernetes.

What I built:

- Real-estate workflow features (property listing, onboarding, verification), scalable APIs, reusable Angular components, and integrations with external government services.

Naga Games

June 2020 - July 2022

Full-stack Developer

Country: Singapore
Team size: 5
Tech stacks used: NestJS, MySQL, React Admin
Responsibilities:

- Developed NestJS services, React Admin dashboards, fixed production issues, optimized queries, and implemented WebSocket features.

What I built:

- Game provider integrations, reporting dashboards, user/game management modules, and high-performance API endpoints.

Coinhako

July 2016 - June 2020

Full-stack Developer

Country: Singapore
Team size: 15
Tech stacks used: Rails, MySQL, HTML5, CSS3, AngularJS
Responsibilities:

- Built e-wallet features with Rails/AngularJS, integrated broker/payment services, improved performance, and handled critical wallet + trading bugs.

What I built:

- Wallet transactions, KYC/AML flows, order processing, payout modules, and secure 3rd-party service integrations.

Various Products in Larion

Jul 2015 - June 2016

Developer

Country: Vietnam
Team size: 50
Tech stacks used: Rails, PostgreSQL, HTML5, CSS3, jQuery
Responsibilities:

- Delivered Rails & React features, built UI components, APIs, and supported client projects.

What I built:

- Admin dashboards, authentication modules, CRUD features, and optimized front-end components.
